

Priority Health Education

where your success is our priority

I would like to introduce our education company. Although the name may be new to you; the education programs, proctors, and consultants in our company are the very best in the industry. Some of our proctors and educators have been teaching for more than 20 years.

We have now organized under one name, **Priority Health Education**. Together we have the largest education team, providing more programs, and in more cities than any similar company.

Our education programs and classes include:

- ✓ ASTEP (the 80 hour AASM program)
- ✓ Board Prep and Review for the RPSGT Exam
- ✓ Scoring a PSG (including the new AASM criteria)
- ✓ Pediatric Sleep
- ✓ RIP & Emerging Technologies
- ✓ Management Retreats (focusing on starting and/or managing a SDC)

In addition to providing our education programs in cities across the country we also provide the following services to assist you in fulfilling your education needs:

- ✓ Custom Designed Education Programs
- ✓ On-site and In-lab Education Programs
- ✓ Education Bundling and Packages to meet your facilities continuing education requirements

This spring we will be introducing our on-line education services in order to provide you with education services 24/7/365. These services include:

- ✓ Continuing Education Products
- ✓ Employee/Staff Training and Education

Most of our classes include continuing education credits and all first time students qualify for discounts on other classes. Group discount pricing is also available. Please visit www.PriorityHealthEducation.com for additional education and contact information. Please call me with any questions or comments.

Yours in sleep,

Candace Anderson
